ELV – Directive

Directive 2000/53/EC of the European Parliament

ELV

“End-of-Life Vehicles”

ELV – Objectives

This Directive lays down measures which aim at the **prevention of waste from vehicles** and at the **reuse, recycling** and other **forms of recovery** of end-of life vehicles and their components to **reduce waste**.

Similarly, to **improve the environmental performance** of all operators involved in the life cycle of vehicles and the operators involved in the treatment of end-traders measures would be credited.

ELV – Forbidden substances

Substances which may not be included in materials and components of vehicles (placing on the market: 01. July 2003):

- Lead
- Mercury
- Cadmium
- Hexavalent chromium

Exceptions see under ANNEX II

ELV – Legal Consideration

Note:

A maximum concentration value up to **0,1%** by weight and per homogeneous material for

- lead
- hexavalent chromium
- mercury

and up to **0,01 %** by weight per homogeneous material for

- cadmium

shall be tolerated
